

61 *Pinus ponderosa* / *Quercus gambelii* Woodland Complex
Ponderosa Pine / Gambel Oak Woodland Complex

Associations:

-*Pinus ponderosa* / *Quercus gambelii*
Woodland
-*Pinus ponderosa* / *Pteridium aquilinum*
Woodland [Provisional]

Common species:

Juniperus scopulorum
Pinus ponderosa
Arctostaphylos patula
Quercus gambelii
Pteridium aquilinum

Project Specifics:

Frequency = 2,185 total polygons
1,730 polygons ZION, 455 polygons Environs
Area = 12,438 total acres
8,763 acres ZION, 3,675 acres Environs
Average Size = 6 acres

Photo Signature Example

Description:

This is a widespread woodland type at ZION. The vast majority of this type represents *Pinus ponderosa* / *Quercus gambelii* Woodland association with a prominent gambel oak understory that appears bright green on the aerial photos. In some limited situations a dense understory of bracken fern gives the same aerial photo signature. This occurs primarily across the Pine Valley and Pocket Mesa areas. This class is rather unique and usually occurs adjacent to other gambel oak types.
